

# EL MEHDI BELHAJ

## Senior Software Engineer

ebelhaaj@gmail.com — +212 648-940480 — [linkedin.com/in/ebelhaj](https://www.linkedin.com/in/ebelhaj)

## PROFESSIONAL SUMMARY

---

Senior Software Engineer with 9+ years of experience designing, developing, and modernizing enterprise web applications across frontend and backend technologies, including React, TypeScript, JavaScript, PHP, Symfony, and Laravel.

Experienced in delivering scalable software solutions, integrating REST APIs, modernizing legacy platforms, and building maintainable applications serving hundreds of thousands of users.

Passionate about software architecture, clean code, accessibility, performance optimization, and collaborating with cross-functional teams to deliver reliable, high-quality products.

## CORE SKILLS

---

**Software Engineering:** React • TypeScript • JavaScript • PHP • Symfony • Laravel

**Frontend:** React • Vue.js 3 • HTML5 • CSS3 • Sass • Bootstrap • Tailwind CSS • Material UI

**Backend & APIs:** REST APIs • Symfony • Laravel • SQL • MySQL

**Architecture:** Component Architecture • Design Systems • Monorepo • Performance Optimization • Accessibility • SEO

**Engineering Practices:** Agile • TDD • Jest • React Testing Library • Code Reviews

**Tools:** Git • GitHub • Bitbucket • AWS Cloud Practitioner • Vite • Webpack • SharePoint Online • Figma

## PROFESSIONAL EXPERIENCE

---

### Globant | Software Engineer — Engineering Studio

Apr 2024 — Present | Casablanca, Morocco

- Designed and developed scalable enterprise applications using React, TypeScript, and Symfony, delivering complex business workflows for a large-scale Learning Management System.
- Contributed to a shared monorepo architecture by developing reusable components and shared packages, improving consistency, maintainability, and engineering efficiency across multiple enterprise applications.
- Led the migration of legacy PHP/Twig interfaces to React using the Cegid Design System, enabling a scalable component-based architecture and a more consistent user experience.
- Developed AI-powered reporting features with interactive visualizations, automated summaries, and production-ready PDF exports, enabling richer insights into learner evaluations while improving reporting efficiency.
- Designed and integrated REST APIs between React frontends and Symfony backend services to support session management, evaluation workflows, and deep-linking capabilities.
- Improve accessibility by implementing WCAG-compliant interfaces using semantic HTML, ARIA attributes, keyboard navigation, and responsive layouts, achieving accessibility scores of up to 98% on LMS modules serving more than 750,000 users.
- Improve software quality through automated testing with Jest and React Testing Library, reducing regressions across complex UI components including tables, dialogs, summaries, and pagination.

## Deloitte | Full Stack Developer — Digital Communications Team

Oct 2017 — Mar 2024 | Casablanca, Morocco

- Designed, developed, and maintained enterprise software solutions for international clients using React, Vue.js, PHP, Laravel, SQL, and modern engineering practices across frontend and backend systems.
- Modernized legacy enterprise applications by introducing React and Vue.js architectures while maintaining existing PHP/Laravel systems, improving scalability and long-term maintainability.
- Developed modern web applications with Vue.js 3, Pinia, and Vite while contributing to backend services and API integrations.
- Collaborated closely with product managers, UX designers, QA engineers, and international development teams in Agile environments to deliver high-quality software.
- Developed enterprise solutions on SharePoint Online for Deloitte's global intranet platform supporting more than 412,000 unique daily visitors.
- Improved software delivery by establishing Git-based workflows, pull request standards, and code review practices, reducing merge conflicts by approximately 30%.
- Automated internal operational processes using UiPath RPA, saving approximately 10 hours of manual work per week and improving overall team productivity.
- Improved frontend performance, accessibility, and SEO by optimizing Core Web Vitals, implementing lazy loading, code splitting, image optimization, semantic HTML, and eliminating render-blocking resources, increasing Lighthouse scores from 66 to 97 on key public-facing pages.

## EDUCATION

---

### Hassan First University | Master's degree in computer science & IT

Sep 2012 — Jun 2017 | Settat, Morocco

- **Final Project:** Developed a Laravel-based web application for medical appointment scheduling and patient record management, improving communication between healthcare professionals and patients.

## CERTIFICATES

---

**AWS Certified Cloud Practitioner** — Amazon Web Services | Apr 2022

**UiPath RPA Developer Certification** — UiPath | Dec 2018
